

Customer Order & Revenue Analysis Project

1. Business Problem:

The objective of this analysis is to understand customer purchasing behaviour, order trends, and revenue performance across categories and cities. The goal is to identify high-performing business segments and provide data-driven recommendations to improve customer engagement and overall revenue growth.

2. Key Metrics:

- Highest Revenue Category: Beauty (₹6,272,535)
- Electronics Revenue Contribution: ₹5,787,270
- Home Category Revenue Contribution: ₹5,352,973
- Clothing Revenue Contribution: ₹5,115,915
- Highest Revenue City: Mumbai (₹5,280,874)
- Surat Revenue Contribution: ₹4,863,592
- Ahmedabad Revenue Contribution: ₹4,091,486
- Highest Revenue Customer: Ira Mehta (₹1,343,161)
- Second Highest Revenue Customer: Diya Mehta (₹1,187,685)
- Highest Monthly Orders: January, February, and April (45 Orders)

3. Customer & Revenue Analysis:

A Revenue column was added to measure total sales performance.

1)Revenue by Category Analysis

Beauty is the highest revenue-generating category with ₹6,272,535 revenue.

Electronics generated ₹5,787,270 in revenue.

Home contributed ₹5,352,973, while Clothing generated ₹5,115,915.

Revenue contribution across categories is relatively balanced.

2)Revenue by City Analysis

Mumbai is the highest-performing city with ₹5,280,874 revenue.

Surat generated ₹4,863,592, showing strong customer demand.

Ahmedabad contributed ₹4,091,486 in total revenue.

Delhi generated the lowest revenue among the analysed cities.

3)Revenue by Customer Analysis

Ira Mehta is the highest revenue-generating customer with ₹1,343,161 contribution.

Diya Mehta generated ₹1,187,685 revenue.

Arjun Sharma and Ishaan Agarwal are also among the top-performing customers.

Some customers contributed very low or zero revenue, indicating low engagement.

4)Monthly Order Trend Analysis

January, February, and April recorded the highest orders with 45 orders each.

March recorded 43 orders, while May had the lowest with 42 orders.

Order trends remain relatively stable across months.

4. Key Insights:

Insight 1: Beauty is the Most Profitable Category

Beauty generated the highest revenue of ₹6,272,535.

This indicates strong customer demand for beauty products.

Insight 2: Mumbai is the Strongest Market

Mumbai generated ₹5,280,874 revenue.

The city contributes the largest share of business revenue.

Insight 3: High-Value Customers Drive Revenue

Ira Mehta and Diya Mehta contribute significantly to total revenue.

A small group of customers generates a major portion of sales.

Insight 4: Monthly Orders are Stable

Orders remain consistent across months with minor variation.

This indicates stable customer demand.

5. Recommendations:

1. Increase focus on Beauty products to maximize revenue growth.
2. Expand marketing efforts in Mumbai and Surat.
3. Build loyalty programs for high-value customers.
4. Improve engagement strategies for low-performing customers.
5. Continue monitoring monthly trends to maintain sales stability.

6. Conclusion:

The analysis highlights strong business performance across categories, cities, and customers. Beauty emerged as the highest revenue-generating category, while Mumbai contributed the highest city-wise revenue. High-value customers such as Ira Mehta and Diya Mehta significantly impact overall sales performance. The findings suggest that focusing on top-performing categories, cities, and customers can help improve revenue growth and customer retention.
